Call for contributions to a Special Issue in Plant Phenomics:

Phenotyping for Sustainable Agriculture: Challenges and Perspectives

We invite contributions on the advancement and impact of plant phenotyping as an open call for publications initiated by the IPPS2019 - the [6th International Plant Phenotyping Symposium](#), held in Nanjing, China, on the 22nd-26th of October 2019.

The contribution will be published in *Plant Phenomics* and with this Special Issue, we want to outline the current status of plant phenotyping collecting studies on technological advancement, understanding the diverse plant environment interactions above or belowground, under controlled or field conditions and, translating this knowledge into application.

The submission is open: <https://www.editorialmanager.com/plantphenomics/default.aspx>
Important: Please use the article type "Special Issue" when submitting and specify "IPPS2019" in the cover letter.

The contributions will be accepted until 31st of December 2019.

NOTE: All contributions to the Special Issue must be within the scope of the Plant Phenomics Journal: <https://spj.sciencemag.org/plantphenomics/mission.and.scope/>
